“Breastfeeding is the greatest gift you can give to your baby. It is the perfect state which the baby instinctively seeks from the moment of birth. That is why LOVI wants to protect lactation and the natural suckling reflex.”

Breastfeeding

Take advantage of professional breastfeeding support

In cooperation with prominent specialists in the field of lactation, neonatologists and speech and language therapists, LOVI brand creates innovative products, providing the necessary assistance to breastfeeding mothers, along with products for alternative feeding and soothing (bottles and teats for serving expressed milk, and soothers), safe for the child's suckling reflex.

This safety is confirmed by the results of the LOVI teat and bottle tests, conducted under clinical conditions, involving large groups of infants, as well as by recommendations from medical practitioners and numerous awards granted for LOVI bottles.

We are trusted by experts, so you can trust us as well.

“Breastfeeding Course”.

Breastfeeding

#TestedInnovations

Trust the experts

LOVI brand in collaboration with leading lactation and neonatal specialists, as well as speech and language therapists, conducts the research and educational programme known as Tested Innovations.

In order to support breastfeeding and the active development of a child from its first days of life, we develop, in conjunction with medical experts, feeding and soothing products that meet the most stringent safety standards.

LOVI accessories are designed based on the latest medical knowledge and innovative technologies.

They are subjected to:

- ✓ clinical trials (bottles, teats and soothers),
- ✓ trials conducted by hospital personnel, with the participation of breastfeeding mothers (breast pumps).

Clinical trials, managed by medical practitioners and midwives, and involving the parents, are carried out in hospitals and specialist clinics. The trials are conducted using a large number of infants to provide statistically meaningful and credible results. Only then are the products placed on the market.

*Based on a survey conducted in 2017 in Poland on a group of 213 midwives.

A close-up photograph of a woman with dark hair, wearing a light-colored knit sweater, breastfeeding her baby. The baby is lying on its side, wearing a light-colored long-sleeved shirt. The woman's hands are gently holding the baby. The background is softly blurred, showing a blue surface.

Breastfeeding

**LOVI Dynamic Teat[®] expands
with the baby's sucking rhythm
– imitating mother's breast.**

Unique achievements of LOVI in promoting healthy suckling

A unique, dynamic structure of the soother

The nipple is made of heterogeneous silicone. It does not impede proper speech or orthodontic development, enables easy breathing and swallowing of saliva, and prevents biting of the soother's nipple. The soother does not impede the suckling reflex in neonates and infants.[†]

The unique technology of heterogeneous silicone feeding teat layers

A thick layer of silicone as a base and a thin layer at the tip of the LOVI Dynamic Teat[®]: the thin tip of the teat expands, actively stimulating the baby's oral muscles to exert effort; its harder base provides a wider, more stable support for the lips and prevents biting of the teat. With this technology the teat is more compatible with breastfeeding and does not impede the suckling reflex.^{**}

[†] When used in accordance with the manufacturer's recommendations provided in the product information leaflet.

^{**} Confirmed through a product usability survey conducted under clinical conditions in 2007 in Poland, using a specialized questionnaire, on a group of 607 infants, involving medical practitioners, midwives and parents.*

A close-up photograph of a woman with dark hair and gold hoop earrings, wearing a white button-down shirt, breastfeeding her baby. The baby is positioned in profile, latched onto the breast. The background is a soft, out-of-focus light color.

Breastfeeding

**LOVI Dynamic Teat[®] enables suckling
in a natural rhythm and does not
disturb the suckling reflex.**

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

LOVI Mammafeel

Soft dynamic teat

- expands and contracts with the baby's suckling reflex

Wide, hard, profiled base

- lets the baby's lips remain tightly attached to the teat
- as on breast

Flesh-coloured ring

- flexible and skin-soft silicone, resembles in color and softness of the areola of the nipple

Breastfeeding

**Breastfeeding is the best gift
that you can give to your baby
on his birth day.**

Protection of breastfeeding

Breastfeeding is the healthiest and most valuable feeding method for newborns and infants. Although most mums want to breastfeed their babies, to begin may prove challenging.

That is why it is so important that your effort ends with success. To help you overcome lactation problems and to protect lactation, **we create products dedicated to natural feeding. These will help you overcome difficulties, while ensuring breastfeeding comfort.**

Thanks to this, those moments spent with the baby attached to your breast will be sheer pleasure.

Breastfeeding

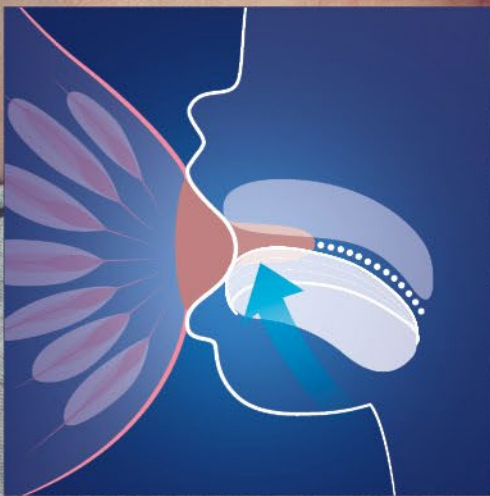

Revolutionary 3D funnel - closest to nature

3D funnel is a revolutionary solution - unlike conventional funnels it presses the nipple. The funnel surrounds and evenly presses the nipple, working in multiple dimensions at the same time, just like a baby's mouth and tongue do.

The even and gentle pressure stimulates prolactin's secretion - the hormone responsible for milk production, causing milk to flow out quickly and naturally, without discomfort.

Baby:

1. Surrounds the nipple with its mouth.
2. Presses it.
3. Vacuum that is created in the mouth causes the milk to flow out.

3D funnel:

1. Surrounds the nipple.
2. Gently presses the nipple.
3. Vacuum that is created causes the milk to flow out into the bottle.

LOVI Breast Pump

Expert in solving lactation problems

Expert 3D^{PRO}

Exclusive protection during day and night

Super absorbent and extremely thin Discreet Elegance pads guarantee dryness both during the day and night.

They are conveniently shaped and finished with an elegant-looking lace, ensuring ultimate comfort and hygiene.

Super absorbent

Gelling filling retains moisture up to 100 ml.

Breathable

They are air permeable, protecting the sensitive breast skin against scalding.

Wrapped individually

Convenience, each pad wrapped individually.

LOVI Nipple Shields Skin Touch

Soft like mother's touch

cat. no.

size S 5/605gb

size M/L 5/606gb

2 pcs in a capsule

Protection of breast nipples

Helpful with concave or flat nipples, they imitate a breast nipple. They can be used after consulting your lactation professional, in cases of hypersensitivity of or damage to the nipples. Available in two sizes: S (small) and M/L (standard).

Extremely thin

Which enables for even easier milk suckling by a child. Thin and soft tip reduces the distance to the nipple.

Matt surface

Imitates mother's skin, its texture and delicacy, and high-quality silicone does not change the taste and smell of milk, which gives the child a feeling of naturalness.

Profiled shape

Enables the baby to maintain direct contact with its mother's breast. Nipple Shields adhere very well to the body thanks to which suckling of breast milk is easier for a child.

Breast Milk Storage Bags

Convenient and safe

It is an excellent protection of what is most valuable - mother's milk

Breast Milk Storage Bags are a safe and hygienic way to preserve mother's milk for longer.

Notes

space to write pack date and amount of liquid.

Scale

readable, visible scale, capacity up to 200 ml.

Storing

suitable for storing in the fridge or in the freezer.

Profiled nozzle

convenient and easy milk pouring from storage bag to bottle.

Tight closure

double closure of the bag prevents accidental spilling of milk.

Sterile bag

ready to use right away.

Lanolin nipple cream

Soothes sore nipples

Lanolin nipple cream

Lanolin cream to use during pregnancy and breastfeeding. Protects against chafing, cracking and soothes sore nipples.

It is 100% pharmaceutical grade lanolin, with no additives, making it hypoallergenic. It is safe for mother and baby, and convenient to use, it does not need to be remove before next breastfeeding.

Lanolin can also be used on chapped lips, dry or sensitive skin.

Natural and hypoallergenic

100% pharmaceutical grade lanolin, no additives, also suitable for sensitive skin.

Relief during breastfeeding

Soothes sore and dry nipples, prevents them from cracking.

No need to remove before breastfeeding

Safe for mother and baby – does not require removal from the nipples before the next breastfeeding.

Combining feeding

Combining breastfeeding with bottle feeding

If you are experiencing periodic breastfeeding difficulties, want to leave your child in the care of another person or if your pediatrician recommends that your baby needs extra feeding for medical reasons, our accessories enable you to feed milk in a way that does not impede your baby's suckling reflex or discourage it from breast suckling. This means you can return to breastfeeding without any problems.

Opinion

of a speech and language therapist

The teat should be constructed in a dynamic fashion and function actively in the mouth of the baby in a manner mimicking breast suckling, while stimulating the infant to actively exert effort. This fosters the correct development of the articulatory apparatus muscles and in the future will provide the basis for the child's proper speech development.

Aleksandra Lada M.D.,PhD,
Speech and Language
Therapist

Speech development

The soft and dynamic tip expands and contracts with the baby's suckling rhythm, enabling active speech muscle training.

Development of bite and proper breathing

The hard and profiled base lets the baby's lips remain tightly attached to the teat – it supports breathing through the nose and prevents biting of the teat base.

Teat made of heterogeneous silicone layers

LOVI Dynamic Teat® for feeding with the mother's expressed milk, designed in conjunction with speech and language therapists. It was created with the use of heterogeneous layer technology: it has a soft, thin, expanding tip and a hard, wide and profiled base. Thus, it does not interfere with breastfeeding. Clinically tested in Poland. It features an effective **SUPER vent** air release system preventing it from getting drawn in and collapsing.

*The flow structure does not require additional air-release.

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

89%

of medical practitioners did not observe any difficulties in combining breastfeeding with bottle feeding using LOVI bottle*

* A product usability survey conducted under clinical conditions in 2007 in Poland, using a specialised questionnaire, on a group of 607 infants aged 0-12 months

Dynamic tip of the teat

Made of a thin layer of silicone. Actively works to stimulate the muscles of the mouth so they are active. The baby has to work for food.

Venting system **SUPER vent**

It reduces the risk of colic. The venting valve prevents the teat from getting drawn in and collapsing, thus reducing the risk of colic.

Hard, wide, profiled base

Made of a thicker layer of silicone. It provides a stable support for the lips. The profile and width of the base, selected by medical experts, ensures the baby opens its lips to the right position.

Combining feeding

Medical+ Bottle with Dynamic Teat®

Protection of the suckling reflex

Tested
by doctors*

Results

of a clinical trial of the LOVI bottle*

A sample survey conducted among medical practitioners, nurses, midwives and parents has confirmed that using the LOVI feeding bottle is safe for breastfeeding, letting the baby preserve their suckling rhythm, the correct coordination of suckling, swallowing and breathing, the active use of lips and tongue muscles, and suckling efficiency.

*A product usability survey conducted under clinical conditions in 2007 in Poland, using a specialised questionnaire, on a group of 607 infants aged 0-12 months

Safe for breastfeeding

A bottle for serving expressed breast milk safe for a breastfed baby as it does not impede its suckling reflex. Designed with the participation of medical professionals and clinically tested.

Provided with a professional Dynamic Teat® made of heterogeneous silicone layers (a thin, dynamic, extending tip and a hard, profiled base).

This requires active suckling by the baby: extensive use of the muscles of its lips and tongue. Compatible with LOVI breast pumps. Equipped with a teat with the **SUPER vent** air-release system.

Withstands repeated boiling.

Self-Sterilising Bottle for steaming in microwave

Safe for breastfeeding

cat. no.

0 m+ teat 150 ml  21/572

3 m+ teat 250 ml  21/570

Fast and easy sterilisation

Innovative Self-Sterilising LOVI Bottle does not require boiling in water or using steam sterilisers.

When properly assembled, the bottle self-sterilises.

Hood and tongs for steaming

Allows you to steam all parts of the bottle in a microwave oven in just 90 seconds.

Step 1.

Pour 30 ml of water in the hood and place all the parts in it.

Step 2.

Put the bottle upside-down in the hood, and place in the microwave oven. After a moment the bottle is ready.

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

Results

of a clinical trial of the LOVI bottle*

The clinical trial of the LOVI bottle equipped with the Dynamic Teat®, conducted on a group of 607 infants aged 0-12 months, has confirmed the product's unique features: the preserved sucking rhythm, the correct coordination of suckling, swallowing and breathing, the active use of lips and tongue muscles, and sucking efficiency.

*Confirmed through a product usability survey conducted under clinical conditions in 2007 in Poland, using a specialized questionnaire, on a group of 607 infants, involving medical practitioners, midwives and parents.

Nature friendly, safe for breastfeeding

The bottle is made of high quality natural material: borosilicate glass (BPA 0%). It will meet the most stringent needs, being extremely durable and resistant to scratching, ensuring a high level of hygiene and keeping the food warm for long.

The innovative glass is resistant to freezing and boiling temperatures, and is renewable. The Dynamic Teat® preserves the suckling reflex and does not discourage the baby from breast suckling. The bottle has a readable scale and permanent print. Compatible with LOVI breast pumps.

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

89%

of medical practitioners did not observe any difficulties in combining breastfeeding with bottle feeding using LOVI bottle*

88%

of medical practitioners - the suckling rhythm of the breastfed baby is maintained*

Natural and ecological material (BPA 0%)

Food temperature remains unchanged for a longer period thanks to the durable and light borosilicate glass. This material is also easy to clean and resistant to freezing and boiling temperatures.

Dynamic tip of the teat

Made of a thin layer of silicone. The tip of the teat expands and contracts with the baby's suckling rhythm, stimulating the muscles of the mouth so they are active. The child has to work to obtain the milk from the teat.

Venting system SUPER vent

Reduces the risk of colic. The venting valve prevents the teat from getting drawn in and collapsing, thus reducing the risk of colic.

Set includes:

- ✓ 150 ml / 250 ml glass bottle (BPA 0%)
- ✓ LOVI Dynamic Teat®
SUPER vent

LOVI Newborn Starter Set Baby Shower

LOVI Newborn Starter Set Baby Shower will be a great gift for future mother, or an element of a baby's layette. It contains all the necessary products to start with. LOVI Dynamic Teats and Soothers are made of heterogeneous silicone layers. They expand just like mother's nipple according to baby's suckling rhythm.

Thanks to it LOVI Medical+ Bottle with dynamic teat is safe for breastfed children because it does not disturb the suckling reflex. Dynamic soother 0-2m will be perfect for newborns and infants in the first weeks of life and thanks to the soother clip with ribbon it will always be at hand.

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

LOVI Dynamic Teat

expands just like mother's nipple, protecting the suckling reflex.

LOVI Dynamic Soother

does not disturb the suckling reflex and natural development of speech and bite patterns.

Anti - colic bottle

thanks to SUPER air vent system.

Soother clip with ribbon

soother will always be at hand.

Set includes:

- ✓ 2 pcs LOVI Medical+ Bottle 150 ml
- ✓ 2 pcs LOVI Medical+ Bottle 250 ml
- ✓ 2 pcs LOVI Dynamic Teat 0m+ (on the bottle)
- ✓ 2 pcs LOVI Dynamic Teat 3m+ (on the bottle)
- ✓ 2 pcs LOVI Silicone Dynamic Soother 0-2 Baby Shower
- ✓ LOVI Soother Clip with Ribbon Baby Shower

Electric Steriliser with Dryer

Convenient and fast sterilization with drying

**Convenient
and fast
sterilization
with drying**

Convenient and fast sterilization with drying

LOVI Sterilizer with Dryer means convenience and quickness.

Up to 3 programs in one device, thanks to which bottles and accessories are sterilized, dry and safe to be used again in 20 minutes.

3 programs:

1. Sterilization Program – natural steam sterilisation – in 10 minutes after switching on
2. Drying Program – possibility of drying in selected time: 10, 30 or 50 minutes
3. Auto Program – automatic sterilisation and drying in 1 hour (10 minutes of sterilisation and 50 minutes of drying)

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

Unique drying function

Ensures maximum hygiene and saves time.

Quick

Sterilisation and drying even in 20 minutes. Just turn on Sterilize program, which lasts 10 minutes and then the shortest Drying program, which also lasts 10 minutes.

Convenient

Up to 3 programs in one device: Sterilization, Drying, Auto

99,9%

Safe

Natural steam sterilisation eliminates up to 99,9% bacteria and ensures maximum hygiene.

Automatic turn off

After the process is completed, the sterilizer will turn off automatically, which increases the safety of using the device.

Spacious

Sterilization and drying 6 bottles and 10 accessories like soothers. Accessories tray is easy to remove, which increases the capacity of sterilizer even to 7-8 bottles.

Set includes:

- ✓ Electric Sterilizer with Dryer
- ✓ Accessories tray

Bottle Warmer

Fast and intuitive milk preparation

**must
have**

SELECTED BY LODZ DESIGN FESTIVAL 2019

AWARD IN ONE OF THE BIGGEST
DESIGNER CONTESTS IN POLAND.

LOVI Bottle Warmer

For preparing milk for your baby quickly and intuitively, at the optimal temperature.

It combines 4 functions:

1. Heats up the food quickly and evenly.
2. Maintains the temperature for up to 10 hours.
3. Gradually defrosts the food.
4. Steam disinfects the bottles and bottle accessories.

Temperature of liquids maintained for up to 10 hours, and defrosting function

Fast heating of food and steam sterilisation of bottles

Food temperature maintained for up to 3 hours

Prevention of overheating

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

Fast

Heats up milk in 2 minutes (80 ml of milk/water at an initial temperature of 21°C).

Intuitive

Thanks to three modes (bottle, HOT, dinner) and an easy to read electronic touchscreen.

Universal

Fits most types of bottles and baby food jars.

Set includes:

- ✓ Bottle warmer
- ✓ Measuring cup

Bottle not included.

Soothing

Soothing

Suckling is fundamental to the development of the child from the moment of its birth. It allows it to control its craving, the quantity of food eaten, as well as helps to soothe its emotions and feelings of safety.

The strong need of suckling is partially satisfied by a soother. Its selection should be well thought out. Its shape and structure should enable breathing and swallowing of saliva, without impeding the natural suckling reflex.

Aleksandra Lada M.D., PhD,
Speech and Language Therapist

Soothing

Dynamic Soother®

Does not impede the suckling reflex

Available in the following sizes:

	0-2m	0-3m	3-6m	6-18m	18m+
shield	 mini	 standard		 standard	
nipple	 mini	 mini	 medium	 standard	 standard strengthened

Tested
by doctors*

Results

of a clinical trial of LOVI soothers*

A product usability survey under clinical conditions* confirmed the unique features of the LOVI Dynamic Soother®:

- does not impede the suckling reflex
- prevents the teat chewing reflex
- enables easy breathing and swallowing of saliva
- does not impede proper speech and orthodontic development

Does not impede the suckling reflex, or proper speech and orthodontic development.

Designed by speech and language therapists with a view to protecting the suckling reflex.

It has a symmetrical shape that is similar to that of a breast nipple. It has a unique dynamic structure made of heterogeneous silicone that enables the natural suckling rhythm.

* A product usability survey conducted under clinical conditions on a group of 150 infants aged 0-18 in specialised, regional paediatric and neurological clinics in Poland, operating under the National Health Fund in Katowice, Rzeszów and Bydgoszcz, involving midwives and parents.

90%

of parents and midwives would recommend LOVI Dynamic Soother® to other parents*

“The shape and structure of the soother should enable breathing and swallowing of saliva and not impede the suckling reflex”

Aleksandra Lada M.D., PhD,
Speech and Language Therapist

Dynamic nipple

Made of heterogeneous silicone, which allows it to expand and contract with the baby's suckling rhythm. The nipple's symmetrical shape is similar to that of a breast nipple.

Profiled mouth shield

Its profiled shape allows the child to freely breathe through its nose. The safe material from which it is made does not contain any Bisphenol A.

Openings in mouth shields

Allows free circulation of air and prevents irritation of the baby's soft skin.

Set includes:

- ✓ Soother 2 pcs
- ✓ Container for hygienic storage of soother

Soother for older children

Strengthened nipple more resistant to biting

Designed for older children

It retains all the properties of soothers for younger children, such as dynamism or a symmetrical shape resembling of mother's breast nipple. The silicone nipple of the soother is strengthened, making it resistant to biting. This is especially important during periods of intensive development of teeth and gums.

Drinking from a cup

Learning how to drink

Is your baby a few months old and have you started to teach him how to drink?

Take advantage of our cups offer for each stage of learning how to drink independently.

You can start with First Cup with spout which is perfect to drink from a cup after bottle or you can choose First Cup with straw to teach your baby to drink from a straw.

Then choose Non-spill cup which allows children to drink independently but control the flow of liquid.

For an older child you can choose our innovative 360° cup without a spout, which teaches the child the adult way of drinking, but without any spills.

A bigger Cup with straw with a comfortable handle will be great for further exploring the world.

Give your child independence

The path
of learning
how to drink

6m+

I'm starting!

**First Cup
with Spout**

Very soft spout
– for an easy start

For children who start
learning to drink from
a cup after a bottle.

First cup with spout

I'm starting to learn to drink

I'm starting to learn to drink

First cup with spout is the perfect cup to start learning how to drink independently after 6 months of age. It allows baby to quickly and easily switch from drinking a bottle to a cup.

It has an extremely soft spout, profiled like a teaspoon making learning to drink even easier. It is handy and light and the profiled handles perfectly fit to the tiny hands of a child.

Profiled spout

The spout is profiled like a teaspoon, perfect to start learning to drink.

Profiled handles

adjusted to tiny child's hands.

Spill cup

water can drip from it freely, that is why the child does not have to put a lot of effort into learning new skills.

Set includes:

- ✓ Cup container with scale
- ✓ Contoured spout 6m+
- ✓ Handles
- ✓ Screw cap

First cup with
weighted straw

I'm learning to drink from a straw

Available capacities:

6m+ 150 ml

I'm learning to drink from a straw

First cup with weighted straw is a cup for the youngest children (6m+) who make their first attempts to drink from a straw. A delicate, flexible straw of a right diameter and length does not irritate the palate and is easy to grab by a child. A safe-sized weighted straw follows the drink and allows to drink freely from any angle. The small size of the cup (150 ml) and the removable cap that allows drinking from all sides make it an ideal cup for children who learn to drink from a straw.

Delicate, silicone straw

does not irritate the palate thanks to the right diameter and length.

Non - spill cup

water does not run out and baby stays clean and dry.

Weighted straw

allows a child to drink freely from different angles.

Set includes:

- ✓ Cup container with scale
- ✓ Weighted straw 6m+
- ✓ Handles
- ✓ Screw cap

Non-spill cup

I drink without spilling

Available capacities:

6m+ 250 ml

A non-spill cup is great choice

For children who have overcome the first steps in learning to drink and they slowly become masters in drinking from a cup with spout. Soft spout is more challenging and forces child to effort and improvement of new skills.

Profiled handles are stronger and perfect for more confident child. The cap protects the spout from getting dirty, which will work both at home and on a walk. The lid fits the base of the LOVI 360° cup.

Soft and silicone spout

The high-quality silicone material is delicate and chemically inert.

Ergonomic

Spout has an ergonomic shape and length that places it away from the child's teeth area.

Easy to wash

All parts of the cup can be easily disassembled for washing. The spout is sterilisable.

Set includes:

- ✓ Soft silicone spout
- ✓ Screw cap
- ✓ Handles
- ✓ Container
- ✓ Cap

Spare spouts available!

360° Cup

Glass-like drinking, but without spilling

Learning the adult way of drinking

360° cup perfect for children ready to drink on their own. Facilitates the transition from sucking liquid from non-spill cups to drinking from a glass. Thanks to innovative venting, it allows sucking the liquid from all around the rim.

It accustoms child to the natural, adult way of drinking (like drinking from a glass) but without spilling. The handles are strong specially contoured for a child in constant motion.

Innovative sealing system

Enables drinking without spilling but it is designed deliberately not to be a non-spill cup so that when shaken vigorously or dropped, droplets of liquid can come out. It teaches the child to control its movements and prepares them to drink from an open cup.

Antibacterial protection

Thanks to natural, antibacterial protection bacteria are reduced up to 99.9%.

Easy to clean

All cup elements can be easily removed and cleaned. A simple structure makes it possible to effectively penetrate all cup areas in order to remove soiling and deposits left by liquids other than water.

Set includes:

- ✓ Cap
- ✓ Three-piece twist
- ✓ Base
- ✓ Handles

Cup with straw

I drink from a straw

Available capacities:

11m+ 250 ml

Learning the independence.

Specially designed to allow the child to drink freely. The straw is made of high-quality silicone. Its length is adjusted so that the liquid stays outside the child's teeth area.

The cup has a cap with a comfortable handle, which allows easy closing and opening also for a child. Characteristic click is a sign that the cup is well closed and can be safely held by the child.

An additional protection against accidental spilling of the drink is the Safe Lock button. Cup with straw allows the child to take a sip, close the cup and move forward for further exploration of the world - just click&go.

Delicate straw

Made of soft, high-quality silicone that does not irritate the gums and is chemically inert.

Convenient handle

It allows easy opening and closing, also by a child. The closure is strong enough to allow the child to hold the cup securely even while moving.

Safety Lock

A specially designed button protects against accidental opening and spilling of a drink.

A woman with long brown hair is smiling and looking down. She is holding a wooden spoon with a drop of yellow liquid on it in her right hand and a wooden bowl in her left hand. The background is blurred, showing what appears to be a kitchen or dining area.

Expanding the diet

Is your child starting to expand the diet? Expanding the diet is an important and new stage in a child's development. It is important not only what the child will eat but also how. LOVI, as an expert in breastfeeding, wants to support mothers also at this stage.

Get to know our products that we have created to meet the expectations of mothers and facilitate the baby's next stage of life.

Tableware

Eating training? Naturally

LOVI Tableware are everything that is necessary to expand the child's diet.

They are ideal products for eating training – the bowls and plates are suitable for a variety of dishes and the cup will be perfect for learning to drink from an open cup.

LOVI products are light, handy, easy to hold and have safe, oval shapes so they can be used by both parents and children. For the production of tableware, we used 20% recycled wood flour, thanks to which there is less plastic in their composition and most importantly these tableware are free of melamine and BPA.

Expanding the diet

First feeding spoon

First spoon? It's easy!

LOVI First feeding spoon is shallow, narrow and firm, making it ideal for starting a diet expansion.

The comfortable, long handle makes it easier for parents to take food from the jar and feeding and allows the child to easily grab the spoon. LOVI spoon has a unique shape, like a logopedic spatula, to makes it easier for a child to pull off food.

For the production of spoons, we used 20% recycled wood flour, thanks to which there is less plastic in their composition and most importantly these spoons are free of melamine and BPA.

LOVI Soup spoons

New stage? Bigger spoon!

Soup Spoon is a facilitation for children and parents when eating larger portions and more varied foods.

The larger spoon, for a new stage, is ideal for children learning to eat independently, thanks to the perfect depth and width food doesn't spill out and the spoon fits perfectly in the child's mouth.

The spoon has a long handle that allows for convenient food application and a sufficiently hard ladle so that the baby's mouth and tongue feel a clear pressure, which affects the correct suckling reflex.

Soup spoon

Expanding the diet

LOVI Silicone bib

**Comfortable.
Practical.
Original.**

LOVI Silicone bib with a pocket is a convenience for parents - it protects against dirt while learning to eat independently.

It is made of light, soft and safe silicone. The hard and deep catches food scraps, comfortably surrounds the belly, reaching wide to the baby's sides. The adjustable clasp and the ergonomic shape of the bib, especially its contoured sides, ensure freedom of movement.

Bib has an original design, thanks to the unique pocket structure, and is also easy to clean and dishwasher safe.

A product usability survey conducted under clinical conditions in 2007, using a specialized questionnaire, on a group of 607 infants aged 0-12 months, involving medical practitioners, nurses, midwives and parents (in Polish hospitals and paediatric clinics) confirmed the following unique features:

- maintenance of suckling rhythm
- correct coordination of suckling, swallowing and breathing
- active work of muscles of lips and tongue
- effective suckling

Clinical trial results prepared by:
Aleksandra Lada M.D., PhD,
Speech and Language Therapist,
Specialist in Feeding and
Communication Development
Disorders in Young Children
/ NDT SLT Senior Tutor

prevention

REMEMBER: LOVI brand recommends breastfeeding as the healthiest feeding method. It recommends to start using an alternative feeding method only after consulting your medical practitioner, midwife or pharmacist, when breastfeeding is impossible or insufficient.

Did you notice any negative changes during breastfeeding after using the LOVI soother?

Does your baby breathe freely through its nose while using the LOVI soother?

Does your baby bite the LOVI soother when using it?

a clinical trial of the LOVI soother

A product usability survey conducted under clinical conditions on a group of 150 infants aged 0-18 in specialised, regional paediatric and neurological clinics in Poland, operating under the National Health Fund in Katowice, Rzeszów and Bydgoszcz, involving midwives and parents in 2010 confirmed the following unique features of LOVI soothesers:

- does not disturb the suckling reflex
- prevents the teat chewing reflex
- enables easy breathing and swallowing of saliva
- does not impede proper speech and orthodontic development*

* provided that recommendations of the orthodontist and speech and language therapist are followed
